OFS SHOWS LATEST TECHNOLOGIES FOR CABLE TELECOMMUNICATIONS INDUSTRY AT SCTE CABLE-TEC EXPO 2008

Norcross, Georgia, June 25, 2008 - OFS, a world leader in the design and manufacture of fiberoptic solutions, will showcase its innovative fiber solutions for the cable telecommunications industry at the SCTE Cable-Tec Expo 2008 in Philadelphia, PA, June 24-27, 2008.

With illustrative live demonstrations and hands-on product displays, the OFS Booth # 1507 will highlight its leading-edge optical fiber products and solutions that can help cable companies provide their customers with high-quality, cost-effective ultra high speed video, voice, data, and many other revenue-generating services.

Products and solutions being displayed at OFS Booth # 1507 include, among others:

= **Drop Node Cables:** OFS' node cables are noted for their excellent transition support and easy installation. Their innovative designs can accommodate a wide variety of loose tube or central core cables with up to 12 fibers. All assemblies are factory assembled and tested. Robust enough for the outside plant environment, the drop node cables can be customized with different type of fibers and connectivity options.

= **EZ-Bend™ Optical Technology:** Optical fiber cables featuring EZ-Bend Optical Technology can be bent to a 5 mm radius and be stapled, with negligible signal loss, and no degradation in picture quality. Visitors will enjoy a hands-on live demo showing the numerous benefits and possibilities this technology offers.

= **All Dry Cables:** OFS' industry-leading, dry fiber cables deliver outstanding water-blocking protection without the use of oil, gels or flooding compounds, while also helping to save time and money on installation even in the most exacting applications.

= **Connectivity Solutions:** Featuring robust design, excellent quality, and easy connectorization, OFS connectivity offerings can lower deployment and maintenance costs while providing reliable performance.

“OFS is committed to providing its customers state-of-the-art technology and exceptional customer service that help them thrive in today’s extremely competitive markets,” said Linda Dembowski, General Manager, Optical Connectivity Solutions at OFS. “Our innovative solutions help optical networks achieve their maximum potential,” Ms. Dembowski added.

SCTE Cable-Tec Expo 2008 attendees can visit OFS at Booth # 1507 at the Pennsylvania Convention Center, or get more information at www.ofsoptics.com.

About OFS

OFS is a world-leading designer, manufacturer and provider of optical fiber, optical fiber cable, connectivity, FTTx and specialty photonics solutions. Our marketing, sales, manufacturing and research teams provide forward-looking, innovative products and solutions in areas including Telecommunications, Medicine, Industrial Automation, Sensing, Government, Aerospace and Defense applications. We provide reliable, cost effective optical solutions to enable our customers to meet the needs of today’s and tomorrow’s digital and energy consumers and businesses.

OFS’ corporate lineage dates back to 1876 and includes technology powerhouses such as AT&T and Lucent Technologies. Today, OFS is owned by Furukawa Electric, a multi-billion dollar global leader in optical communications.
