14	SC Duplex Adapter Plate E/W SC DUPLEX ADAPTER	1

KNOCK OUT CABLE PORT & MARK DRILL HOLES ON WALL

1. THE OUTSIDE PLANT FEEDER CABLE ENTERS THROUGH THE CENTER BOTTOM PORT.
2. THE DROP CABLE EXITS THROUGH THE BACK WALL OF THE BACK BOX. CUT OUT THE WALL OF THIS CABLE PORT WITH A UTILITY KNIFE.
3. USE THE BACK BOX TO MARK THE WALL FOR THE SCREWS AND THE DROP CABLE. SEE PAGE 3 FOR FULL SIZE DRILL PATTERN. MAKE SURE THE BACK BOX IS LEVEL WHEN THE HOLES ARE MARKED.

SC DUPLEX ADAPTER PLATE SUBASSEMBLY

4. THE ABOVE TWO FIGURES SHOW HOW THE SC DUPLEX ADAPTER PLATE IS FITTED AND FASTENED INTO THE BACK BOX.

FASTEN BACK BOX TO WALL

5. FOLLOW SAFETY GUIDELINES AND LOCAL PRACTICES WHEN DRILLING HOLES INTO AN UNFAMILIAR WALL. DRILL TWO .295" [7.5MM] OD X 1 1/4" [31.75MM] DEEP HOLES FOR THE WALL ANCHORS. SIZE THE CABLE HOLE SO THAT THE SC CONNECTOR EASILY PASSES THROUGH THE WALL.

NOTE: IF THE WALL ANCHORS ARE NOT USED AND THE SCREWS ARE SCREWED DIRECTLY INTO THE WALL, THEN THE HOLE SIZE FOR THE ANCHORS IS .125" [3.2MM] OD.

6. INSERT THE WALL ANCHORS INTO THE TWO .295" [7.5MM] OD HOLES. PUSH THEM IN SO THAT THEIR SHOULDER BUTTS UP AGAINST THE WALL.

7. FASTEN THE BACK BOX TO THE WALL USING TWO M3.5 X 25MM SCREWS. SEAL THE TWO SCREW HOLES AS PER LOCAL PRACTICE.

FULL SIZE DRILL PATTERN

INSERT CABLE
