

Enhance Your Fiber Experience throughout the Home

InvisiLight™ Solutions for
Fiber to the Room (FTTR) Applications

Fiber to the Room is simply fiber to multiple rooms in a home with dedicated Wi-Fi in each room. The result can reduce 'dead spots' and offer greatly improved bandwidth and lower latency than multi-room Wi-Fi systems. InvisiLight Solutions make it easy to bring fiber to the room in existing homes invisibly – even by a homeowner!

BENEFITS

- **Less time** inside customer premises
- **Clean** installation
- **High quality** and **reliable**
- **Blends into** the decor

APPLICATIONS

- Emerging FTTR systems using advanced in-room Wi-Fi
- Larger homes or applications, like gaming, requiring better performance
- Homes made of materials that limit Wi-Fi coverage
- Extending fiber using point to point ethernet in home
- InvisiLight Solutions have connected over 1 million subscribers to fiber in homes and apartments – and this proven technology is ideal to bring fiber to the room.
