10. Classification Substantiation Cable attenuation testing; UL approval of alternate jacket material			
11. Reason(s) for Change/Recall OFS' standard supplier of riser-grade PVC resins is having production quality issues that are negatively impacting OFS' ability to produce cable to customer expectations. Although OFS and this supplier are working diligently to resolve these issues, there is no resolution date for them as of yet. As such OFS proposes use of an alternate, significantly more expensive PVC jacketing compound, which is typically used for Plenum grade cable jacketing. UL has approved this substitution, and this substitution will have no impact on performance, form, fit or function of these cables. In the short term, OFS intends to ship cables with this alternate jacket material, at no added cost to customers. While this issue is being resolved, customers may receive cables with either jacketing material.			
12. Description of Change/Recall This change will not affect the form, fit or function in any way. The cable jacket surface may be slightly less glossy.			
13. Effect of Change/Recall The change will provide flexibility to allow OFS to deliver cable promptly to customers
