OFS Launches FlightLinx® PLUS Fiber Optic Cable
at SAE 2017, Aerotech Congress and Exhibition

Reliable termination helps prevent kinking and fiber breakage during and after deployment

Avon, CT, September 20, 2017 - OFS, a leading designer, manufacturer and supplier of innovative fiber optic products is pleased to announce the launch of FlightLinx® PLUS Fiber Optic Cable. This new cable is designed for inflight entertainment, internet access, networking and display systems used in commercial aircraft.

OFS has manufactured FlightLinx Fiber Optic Cable since 2012 and is now expanding the product line to include a cable design that allows for reliable pull-proof termination during harsh aircraft installations. FlightLinx PLUS Fiber Optic Cable is a 1.8 mm ruggedized single jacket cable design that meets ARINC 802 performance requirements without the need for a double jacket. This lightweight cable design also helps address the demand for lighter aircraft and improved fuel efficiency.

LeRuth P. Bell, OFS Aerospace and Defense Market Manager, stated, “It is critical that data communication on commercial aircraft remains reliable. Once terminated, FlightLinx PLUS Fiber Optic Cable can be pulled on without creating an optical disconnection that would interrupt data communications. Additionally, premium 62.5 µm OFS fiber addresses the industry’s requirement for increased bandwidth,” Mrs. Bell continued. “Plus, the lighter design can help positively impact our customers’ bottom line.”

For more information on this cable watch this video or please see an expert at SAE 2017 AeroTech Congress and Exhibition at OFS booth #808, or contact your local OFS representative for more information.

About OFS

OFS is a world-leading designer, manufacturer and provider of optical fiber, fiber optic cable, connectivity, fiber-to-the-subscriber (FTTx) and specialty photonics products. We provide
reliable, cost-effective solutions for a broad range of applications including telecommunications, medicine, industrial automation, sensing, government, aerospace and defense. These products help our customers meet the needs of consumers and businesses, both today and into the future.

Headquartered in Norcross (near Atlanta) Georgia, U.S.A., OFS is a global provider with facilities in China, Denmark, Germany, Russia and the United States. OFS is part of Furukawa Electric Company, a multi-billion dollar leader in optical communications.
