

## **OFS Launches New Optical Coherence Tomography (OCT) Probe Capability at BiOS / Photonics West Conferences**

**Norcross, Georgia. 7 February 2015** - OFS, a leading designer, manufacturer, and supplier of innovative fiber optic products will showcase its new OCT optical fiber assembly capabilities at the BiOS / Photonics West Exposition located at the Moscone Center in San Francisco, California from 7 through 12 February 2015.

OFS has developed a technology platform to build high quality optical fiber probes with flexible tip lensing designs to meet critical OCT imaging specifications such as: insertion loss, internal back reflection, beam size, and working distance.

Mr. R. Steve Allen, OFS Marketing Manager states, “because OFS is vertically integrated with preform (glass) manufacturing, we can make a wide range of fibers with unique features such as select cutoff, specific numerical apertures, graded index fibers, and coreless fibers.” Mr. Allen continues, “in addition, we have extensive polishing and fiber tip shaping skills and can assemble a custom lens design for each customer.”

For more information on these and other OFS products, stop by the OFS booth #9023 at BiOS or #1023 at Photonics West or visit [www.ofsoptics.com](http://www.ofsoptics.com).

### About OFS

OFS is a world-leading designer, manufacturer and provider of optical fiber, fiber optic cable, connectivity, fiber-to-the-subscriber (FTTX) and specialty photonics products. We provide reliable, cost-effective solutions for a broad range of applications including telecommunications, medicine, industrial automation, sensing, government, aerospace and defense. These products help our customers meet the needs of consumers and businesses, both today and into the future.

Headquartered in Norcross (near Atlanta) Georgia, U.S.A., OFS is a global provider with facilities in China, Denmark, Germany, Russia and the United States. OFS is part of Furukawa Electric Company, a multi-billion dollar leader in optical communications.
