## **OFS BRANDS EDF PRODUCTS AS RIGHTWAVE™ EDF PRODUCT FAMILY WITH OVER 20,000 km SHIPPED**

**Somerset, New Jersey, July 9, 2012** - OFS, a leading designer, manufacturer and supplier of innovative fiber optic network products, today announced new branding for its erbium doped fiber (EDF) portfolio. OFS has a corporate heritage in EDF going back to 1989. Today, with over thirty EDF products and more than 20,000 kilometers shipped over the past ten years, OFS has the industry's broadest EDF portfolio, which will now be known as the RightWave™ EDF Product Family. This product family includes the successful flagship EDF MP980 that is a desired choice for erbium doped fiber amplifier (EDFA) product designs worldwide, while other products within the portfolio are geared towards amplifiers operating in the C-Band and L-Band. Manufacturers also benefit from 80micrometer EDF variants that are used in compact amplifier designs. The product family is well rounded with products for amplified spontaneous emission (ASE) sources, highly doped EDF and polarization maintaining EDF.

The key advantages of choosing OFS and the RightWave™ EDF Family are:

- Breadth of portfolio offering wide choice for various amplifier designs
- Proven experience and knowledge base delivering quality products
- High reliability with manufacturing processes and lot-to-lot uniformity
- Excellent spectral characteristics such as low noise, gain flatness and high efficiency
- Dual-source option with multi-site production capacity

- Topnotch specialty services to develop proprietary specifications

OFS is a market leader with a broad portfolio of fiber products for different segments including telecom, data communications, government and defense, medical and industrial market segments. OFS Labs, the research and development arm of OFS, continues to design new fibers for next generation amplifiers. Years of proven experience in delivering high-quality, high-performance and high-reliability EDF, distinguish OFS as a trusted fiber solutions partner. These factors combined with excellent customer service and the ability to fulfill the needs of both large and small manufacturers become increasingly important when choosing a source for the supply of EDF. “As experts in specialty fiber, OFS continues pushing the boundaries of physics to innovate new fiber designs and processes that meet challenges and evolving future needs of our customers globally.” said Anurag Jain, product marketing manager, OFS.

## **About OFS**

OFS is a world-leading designer, manufacturer and provider of optical fiber, optical fiber cable, connectivity, FTTx and specialty photonics solutions. Our marketing, sales, manufacturing and research teams provide forward-looking, innovative products and solutions in areas including Telecommunications, Medicine, Industrial Automation, Sensing, Government, Aerospace and Defense applications. We provide reliable, cost effective optical solutions to enable our customers to meet the needs of today’s and tomorrow’s digital and energy consumers and businesses.

OFS’ corporate lineage dates back to 1876 and includes technology powerhouses such as AT&T and Lucent Technologies. Today, OFS is owned by Furukawa Electric, a multi-billion dollar global leader in optical communications.
